Errázuriz Achieves Triple Quality Assurance and Environmental Certification

ISO 9001:2000
ISO 14001:1996
HACCAP-93/43

The Errázuriz Management team, headed by Managing Director Ricardo Urresti and Operations Director Jorge Matte, submitted their application for the three citations after an eighteen-month review of the company's practices. Viña Errázuriz received from DQS-Germany all three certifications at the same time, and on their first application.

Plans are to certify under the British Retail Consortium regulations during the first quarter of 2004.

1 From left to right: Viña Errázuriz team responsible for the certifications: Carlos Barriga, Technical Manager, Gonzalo Claverie, Production Manager, Ricardo Urresti, Managing Director, and Jorge Matte, Operations Manager.

2 Ricardo Urresti receives certificates from DQS representative. DQS was established in 1985 in Germany as a global independent certifier of ISO standards. Today, DQS is recognized worldwide as one of the most reputed companies in its field.

DQS is member of:

Viña Errázuriz has boosted its position as one of Chile's leading wineries in terms of quality assurance, environmental protection and exacting

working standards by receiving ISO 9001:2000, ISO 14001:1996 and HACCAP-93/43. With these certifications, Viña Errázuriz assures its consumers with

products that comply with strict quality control and environmentally secure norms.

**ISO 9001: 2000
CERTIFICATION**

ISO 9001:2000

This certification sets exacting standards in quality control and traceability of our products. We are able to track our wines from the grapes and vineyard where they come from to the final bottling. Additionally, through this norm, key performance indicators have been set that ultimately add value to the customer. These refer to management processes that are measurable and in which minimum standards can be set. For example in logistics, wherein customer's orders are completed and dealt with on time, or in packaging to ensure that labeling complies with market requirements.

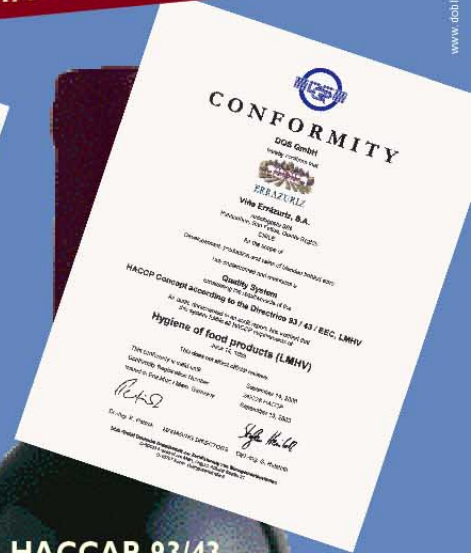

**ISO 14001: 1996
CERTIFICATION**

ISO 14001:1996

This certification provides the guidelines for the company's environmental management, focusing on the design and development of policies as well as on the evaluation and auditing of the organization's environmental issues. With this Certification, Viña Errázuriz moves forward yet one more step in its permanent concern for the environment and sustainable development and re-enforces our commitment to this.

HACCAP-93/43

HACCAP-93/43

This standard (Hazard Analysis and Critical Control Points) is designed to prevent any possible biological, physical or chemical contamination in the finished wine with the aim of assuring consumers that our wines are secure and produce no harm to human health.

We export more than 90% of the wines we produce to more than fifty countries worldwide. These

three certifications will advance commercial trade attesting our commitment to quality.
